

Wheelchair Accessible Citroën Berlingo Hycar 4 + 1

The conversion creates a multifunctional Berlingo, in which you can transport 4 passengers or 1 or 2 passengers with a wheelchairpassenger.

The conversion is invisible form the outside.

It is possible to lower the Berlingo with the hydraulic kneeling. This makes the entrance and exit with a wheelchair even easier.

The ramp is 70 cm long, 74 cm wide, easy and light to operate and has a durable grip coating.

Because of the short ramp, the rear view remains in tact.

It is possible to keep the original seat and bench. They are locked in to the floor so you do not have spare supports.

The seat and bench are approved according to **EEG directive 74/408/EEG and 76/115/EEG.**

The lowered floor creates an entrance of 139 cm, is 76 cm wide and 122 cm long with the original seat and bench.

The original exhaust is adapted. A new tank, with 54 L, is mounted.

B-style does not only convert the Berlingo but also the Jumpy and Jumper. We have a hydraulic kneeling or an air-suspension. Interior, lowered floor, ramp, lift or ...

If you have questions, remarks or if you are interested please contact us because B-style has a solution for every mobility need.
