

Wheelchair Accessible Volkswagen Caddy Hycar

The conversion creates a multifunctional Caddy, in which you can transport 4 passengers or 1 or 2 passengers with a wheelchairpassenger.

The conversion is invisible form the outside.

It is possible to lower the Caddy with the hydraulic kneeling. This makes the entrance and exit with a wheelchair even easier.

The Caddy can lower a maximum of 6 cm.

The ramp is 90 cm long, 80 cm wide, easy and light to operate and has a durable grip coating.

Because of the short ramp, the rear view remains in tact.

It is possible to keep the original seat and bench. They are locked in to the floor so you do not have spare supports.

The seat and bench are approved according to **EEG directive 74/408/EEG and 76/115/EEG.**

The lowered floor creates an entrance of 145 cm, is 82 cm wide and 143 cm long (without original seat and bench).

The original exhaust is adapted. A new tank, with 52 L, is mounted.

B-style does not only convert the Caddy but also the Transporter/Caravelle and LT. We have a hydraulic kneeling or an air-suspension. Interior, lowered floor, ramp, lift or ...

If you have questions, remarks or if you are interested please contact us because B-style has a solution for every mobility need.
