

Wheelchair Accessible Renault Kangoo 4 + 1

The conversion creates a multifunctional Kangoo, in which you can transport 4 passengers or 1 or 2 passengers with a wheelchairpassenger.

The conversion is invisible form the outside.

It is possible to lower the Kangoo with the hydraulic kneeling. This makes the entrance and exit with a wheelchair even easier.

The ramp is 88 cm long, 82 cm wide, easy and light to operate and has a durable grip coating.

Because of the short ramp, the rear view remains in tact.

It is possible to keep the original seat and bench. They are locked in to the floor so you do not have spare supports.

The seat and bench are approved according to **EEG directive 74/408/EEG and 76/115/EEG.**

The lowered floor creates an entrance of 142 cm, is 84 cm wide and 130 cm long.

The original exhaust is adapted. A new tank, with 40 L, is mounted.

B-style does not only convert the Kangoo but also the Traffic and Master. We have a hydraulic kneeling or an air-suspension. Interior, lowered floor, ramp, lift or ...
