## VOLKSWAGEN CADDY MAXI

### MULTIFUNCTIONAL WHEELCHAIR VAN

B-style has developed a conversion kit for the Volkswagen Caddy Maxi so it can be converted to a wheelchair van suitable for multifunctional use. The Caddy Maxi wheelchair van easily accommodates four seated passengers plus driver and one wheelchair passenger. Moreover, this Caddy Maxi has the widest wheelchair space in its class (a phenomenal 85 cm). The Caddy Maxi suits for private use, but can also be operated as a multifunctional taxi.

B-style has received approval from Volkswagen for the lowered floor in the Caddy Maxi. Accordingly, the full factory warranty remains in effect.

B-style works with you to deliver a high-quality product that perfectly meets your demands. We achieve this with a personal approach, an innovative development department and experienced professionals. All our activities are conducted in conformance with European regulations and the guidelines provided by the various vehicle manufacturers.

## MULTIFUNCTIONAL WHEELCHAIR VAN

### Lightweight ramp

The lightweight ramp is easy to operate and provides easy wheelchair access to the vehicle. A hydraulic kneeling system can be installed as an option.

### Low floor

The large, low floor (150x85cm) is completely horizontal, so the wheelchair passenger is in no danger of tipping backwards. The internal headroom is 140 cm.

### Wheelchair tie down system

The wheelchair tie down system and the three-point safety belt meet the requirements of ISO 10542. It even meets the Swedish standard: the construction is much stronger.

### Original rear bench

The original rear bench comfortably accommodates three adults.

### Invisible low floor

The centre section of the rear bumper is attached to the tailgate, so the lowered floor has hardly any impact on the exterior appearance. The original parking sensors can be retained (optional).

### Foldable ramp

Optionally, the lightweight ramp can be hinged to fold completely into the floor. This allows you to retain the full boot space.
